The Researcher

My name is Ulumul Umah, and I am a student at Universitas Negeri Malang. I am conducting a qualitative research study on students' questioning.

The Research

The purpose of this study is to gain insight into the role of inquisitive questions in students' understanding of mathematics texts. The study's findings will be able to assist mathematics educators in determining if they would benefit from the student-generated question.

The Process

Your participation in the study will involve three sessions of learning activity in class and an interview in a focus group discussion with an estimated length of one hour. This learning activity and interview will be tape-recorded for later analysis.

Risk

This study poses little to no risk to its participants. I will do my best to ensure that confidentiality is maintained by not citing your actual name within the actual study. You may choose to leave the study at any time, and may also request that any data collected from you not be used in the study.

By signing below you agree that you have read and understood the above information, and would be interested in participating in this study.
